## *Ethernet adapters, USB-C hubs, and UL-certified surge protectors*

*Many modern laptops, especially those from Dell and HP, may lack built-in Ethernet ports due to the trend towards slimmer designs but will have USB-C slots. If you're spending \$700 or more on a laptop, TV, or small appliance, it's wise to invest an additional \$15-20 on Ethernet adapters, USB-C hubs, and UL-certified surge protectors. Ensure all your surge protectors are UL-certified!*
